WASHING & CARE GUIDELINES

PLAIN BAY EQUINE

Standard Washes

All blankets will go through two cold wash cycles using Blanket Safe soap, then air-dried outdoors in the sunshine for 24 hours.

Standard Waterproofing

Items undergoing waterproofing will be thoroughly washed and dried before applying a mist of water repellent. They will then cure for 48 hours before being bagged.

Please note that any waterproofing treatment—other than the original factory-applied protection—will not make items fully waterproof in heavy rain. Blanket Safe water repellent is designed to provide protection during light showers, without the use of wax or silicone that inhibits overall breathability, and the effectiveness depends on the age and quality of the blanket fabric.

Add-Ons

All washed blankets will be returned with new T-lock bands, a color-coded tag indicating blanket weight, and packaged in a clear bag. If you wish to have your blanket repaired, it must go through our wash service before being handled by our seamstress. If you'd like any upgrades, please specify your selections on the order form for each blanket.
